Conversation 2: Opportunities and Challenges for Community Programs on Viruses and Cancer (Hepatitis B or C and Liver Cancer, HPV and Cervical, Oropharyngeal, Other Cancers)

Facilitator: Sherrie Flynt Wallington, PhD, Lombardi Comprehensive Cancer Center, Georgetown University Medical Center

Resource Person: Stacey Trooskin, MD, PhD, MPH, Philadelphia FIGHT

Practical Actions
- Convening meetings with stakeholders
- Changing the culture of the climate around viruses
- Let people know the vaccine cost can be covered
- Improving health education materials
- Use trusted community members to distribute information on HPV, HepB, and HepC
- Educate the family about primary health
- Identify the “change agents”
- Educate through school based health systems
- Look for anthropological methods for recruiting people to health education events
- Add immunization message into the school system
- Make sure survivors are at the table for conversation
- Community health workers-learn from the HIV education world

Opportunities/Challenges
- Opportunities
  - Partnerships
  - Policy/ Legislation
    - 2-dose HPV vaccine coverage
    - Medicaid restriction to HepC cure
      - Severity restriction laws
      - Comorbidity of addiction
      - Provider restriction – must be expert to provide Rx
  - Training next generation of medical/ health professionals
  - Increase community work opportunities in medical school
- Health Literacy
  - Improve health education materials (print materials v. video)
- Challenges
  - Storage of vaccines in medical practices
Pressure on doctors to see more patients for money

Current programs focused on viruses and cancer in your workplace or community
- Assessment of HPV perceptions and attitudes
  - Training with providers
  - Education of parents
- Family planning clinics providing HPV tests and vaccines
- Women’s Cancer Control Program in Montgomery County
- Breast and Cervical Cancer Program funded by CDC
- Chronic Disease Public Opinion Poll
- Think About the Link
- Philadelphia FIGHT
  - Examine EMR protocols for baby boomers
  - HepCAP to educate PCPs

Current climate around viruses and cancers in terms of awareness and implementation
- Anti-vaccine advertisements
- Concerns with privacy of their health information
- Stigma around contracting STIs
- Confusion of when to provide HPV tests and vaccines

Parking Lot
- Value of storytelling to increase awareness of link between viruses and cancer
- Funding for community health educators
- Tailoring public health messages for diverse audiences
  - Play videos in locations where people primarily convene
- Accessibility of vaccine
- Improve implementation of vaccine programs
  - Storage of vaccines
  - Hours of operation for health clinic operations
