Cancer Prevention Program®

Amy Sokal
Managing Director, Finance and Administration
The Prevent Cancer Foundation® is the only U.S. nonprofit focused solely on cancer prevention and early detection. Founded in 1985, the Foundation has catapulted cancer prevention to prominence and fulfills its mission through research, education, outreach and advocacy.
Dear Friends,

This year, early detection and prevention strategies are more important than ever. While the debate over health care in the U.S. Congress continues, the fact remains that prevention and early detection reduce health care costs and save lives.

For more than 30 years, the Prevent Cancer Foundation® has been leading the charge to make prevention and early detection the primary drivers in reducing cancer incidence and death—and we have never been more committed to that mission.

With your support, we will continue to fund groundbreaking research, education campaigns and service programs, while going deeper into our local communities than ever before to deliver prevention and screening services to the underserved.

Thank you for your support of all we have accomplished this year. We look toward the Foundation’s future with optimism and enthusiasm.

Sincerely,

Carolyn R. Aldigé
President and Founder

Scott McIntyre
Chairman of the Board

“For more than 30 years, the Prevent Cancer Foundation® has been leading the charge to make prevention and early detection the primary drivers in reducing cancer incidence and death—and we have never been more committed to that mission.”
Our story

WHO WE ARE...

We are volunteers, advocates, caregivers, survivors, researchers and donors. Together we are working to Stop Cancer Before It Starts®.

Cancer prevention and early detection are at the core of our mission—and it is that mission which connects and strengthens us as we serve communities across the nation and around the world. We educate the public on healthy lifestyles and the importance of vaccinations, regular screenings and knowing your family history; we provide people with lifesaving information and direct service programs; we advocate for policies and regulations that advance cancer prevention and early detection and make services more accessible to all populations and we continue to fund cutting-edge cancer research. Our values and our mission fuel our work at the Prevent Cancer Foundation® and we are proud of the work we do.
Nearly **1.7 Million Americans** will be diagnosed with cancer this year

More than **600,000 will die**

Up to **50% of cancer cases** and about **50% of cancer deaths** are **preventable** with what we know right now.
Research suggests that only five to ten percent of cancers are hereditary. That means the non-inherited causes of cancer—the lifestyle choices we make, the foods we eat and our physical activity levels—have a direct impact on our overall cancer risk.
INSPIRING A NEW GENERATION OF RESEARCH

Since 1985, you have funded innovative cancer research on prevention and early detection, enabling the Foundation to award grants and fellowships to hundreds of scientists from leading academic medical centers across the country. This year’s grantees are an exceptional group, pushing the envelope of science and technology.

**Grantee**: Leah Frerichs, Ph.D.
**Named Award**: Marvin Davis Estate
**Institution**: The University of North Carolina at Chapel Hill, Chapel Hill, NC
**Project Title**: A randomized trial of an American Indian colon cancer screening strategy

American Indians are the only U.S. racial or ethnic group who has not had decreases in colorectal cancer cases and deaths. Dr. Frerichs’ research project will test a culturally-sensitive multimedia video designed to overcome literacy and cultural barriers to improve colorectal cancer screening among American Indians.

**Grantee**: Jo Freudenheim, Ph.D.
**Named Award**: Richard C. Devereaux Grant
**Institution**: The Research Foundation for The SUNY on behalf of University at Buffalo, Buffalo, NY
**Project Title**: Effects of electronic cigarette use on the human lung

Smoking greatly increases lung cancer risk. Electronic cigarettes (e-cigs) are increasingly being used for smoking cessation and by people who have never smoked. Biological effects of e-cigs are not known. Dr. Freudenheim will study lung tissue from healthy young adults, smokers, never smokers and e-cig users.
**Grantee:** Rosa Munoz Xicola, Ph.D.

**Named Award:** Figdor Family Grant

**Institution:** Yale University School of Medicine, New Haven, CT

**Project Title:** New DNA repair alterations in hereditary cancer development

Patients with undefined cancer disorders that seem to be inherited tend to have a very high risk of developing cancer at young ages. Dr. Munoz Xicola will work to identify their molecular causes, which will allow us to tailor health care measures to prevent new diagnoses and provide adequate treatment to patients and family members.

**Fellow:** Rajesh Panigrahi, Ph.D.

**Named Award:** Figdor Family Fellowship

**Institution:** University of Massachusetts Medical School, Worcester, MA

**Project Title:** A virus-like particle vaccine for prevention of Epstein-Barr virus (EBV) associated cancer

Despite the enormous success of virus-like particle (VLP) vaccines that safely prevent hepatitis B virus and human papillomavirus (HPV) associated cancers, no EBV vaccine is licensed. EBV, a major human tumor-causing virus, cannot form VLP vaccines. Using a novel fusion platform, Dr. Panigrahi’s research team developed an EBV-VLP candidate for cancer prevention and aims to develop an EBV vaccine that safely stimulates protective immunity to eliminate infection and cancer.
Each year, the Foundation receives scores of grant proposals from promising scientists doing remarkable work in fighting cancer. Each proposal is carefully peer-reviewed through a process similar to that of the National Institutes of Health. Funding is approved by the Foundation’s Board of Directors. Your donations mean we can support more talented scientists who are working to Stop Cancer Before It Starts®.

**Grantee:** Brian Rood, M.D.

**Named Award:** Sarah Howard Childhood Cancer Fund for Our Children’s Health Grant

**Institution:** Children’s Research Institute, Washington, D.C.

**Project Title:** Medulloblastoma risk and the germline foundation of predisposition

Microsatellites are DNA markers that associate non-randomly with disease states and can influence the function of nearby genes. Dr. Rood will work to identify medulloblastoma-specific microsatellite genotypes, which will provide the ability to predict the relative risk of individuals and yield insight into potential preventive strategies.

---

**Grantee:** Matthew Stachler, M.D., Ph.D.

**Named Award:** Marcia and Frank Carlucci Charitable Foundation Grant

**Institution:** Brigham and Women’s Hospital, Inc., Boston, MA

**Project Title:** Genomic features associated with cancer development in Barrett’s biopsies

Despite a known precursor and screening, most esophageal cancers are not detected early and are incurable. Dr. Stachler’s research team aims to determine the genomic differences in the precursor between people who do and do not get cancer, in order to develop markers of disease progression for early detection and treatment.
Grantee: Kymberle Sterling, Dr.PH., M.P.H.
Institution: Georgia State University Research Foundation, Inc., Atlanta, GA
Project Title: The little cigar and cigarillo photovoice feasibility project
Little cigar and cigarillo (LCC) smoking has increased, particularly among African-American youth. Cigar use increases the risk of developing cancer. Dr. Sterling’s research will assess factors that can prevent the initiation of LCC smoking.

Grantee: Zhenyu Zhong, Ph.D.
Named Award: Prevent Cancer Foundation Board of Directors Research Fund
Institution: University of California, San Diego, San Diego, CA
Project Title: Prevention of obesity-induced HCC by inhibition of sterile inflammation
Obesity promotes the development of liver cancer, however, the underlying mechanism remains elusive. Dr. Zhong will investigate how obesity induces liver inflammation and cancer development, and will promote the development of new preventive strategies for obesity-associated liver cancer.

“The Fellowship grant I received from the Prevent Cancer Foundation was the first grant I received. I credit it with providing the crucial support I needed to establish myself, and my current research program is built entirely on the work I performed during my Fellowship.”

—Karen Sfanos, M.D., Ph.D.
Johns Hopkins University
The Congressional Families Cancer Prevention Program® is a bipartisan network of spouses of members of the House, Senate, administration, Supreme Court and diplomatic community who share an interest in advancing cancer prevention, early detection and education.

The Program regularly hosts seminars and events that bring together members and spouses with health professionals and medical experts, creating dialogue and equipping them with the tools to bring the message of cancer prevention and early detection back to their communities and constituents.

The Program held its 24th Annual Action for Cancer Awareness Awards Luncheon on September 22, 2016. The event recognized congressional spouse Pat Mica (wife of Rep. John Mica, FL.), Olympic medalist Summer Sanders and journalist Amy Robach (“Good Morning America”) for using their platforms to educate the public about cancer prevention and screening. Nearly 50 congressional and diplomatic spouses and more than 25 members of the House and Senate joined leaders in the cancer community for the bipartisan event.

(L to R) Summer Sanders, Carolyn Aldigé, Amy Robach, Pat Mica, Paula Zahn and Lisa McGovern
“I was very uninformed when I was first diagnosed with hepatitis C. Now I feel it’s important to offer as much information as possible to those who may be shy or ashamed of having contracted this virus.”

Alejandro Escovedo
Hepatitis C survivor
Mexican-American singer/songwriter
Think About the Link® spokesperson

“I believe knowledge is power. What happened to me is now preventable—and we need to educate our communities about the link between HPV and cancer.”

Marissa Jaret Winokur
Cancer survivor
Actress and Tony Award winner
Think About the Link® spokesperson
Think About the Link® is a prevention and education campaign from the Prevent Cancer Foundation® about the connection between viruses and cancer.

Hundreds of thousands of people in the world suffer from cancers caused by viruses and millions more suffer from the viruses that cause them. Think About the Link® raises awareness of the link between human papillomavirus (HPV), hepatitis B, and hepatitis C and the many cancers they can cause.

This year, Think About the Link® launched a national public service campaign, partnered with Scholastic to reach thousands of parents about the importance of getting their kids vaccinated for HPV, and traveled to high-risk communities to spread awareness and vaccinate, screen and treat disparate populations for hepatitis B and C.

To learn more, visit ThinkAboutTheLink.org
For hundreds of women in rural Appalachia, the Think About the Link® health fair, in partnership with the College of American Pathologists in Norton, Virginia, was the only health care they received all year. The fair drew hundreds of women and families from Virginia, West Virginia, Kentucky and Tennessee, and provided cervical and breast cancer screenings; HPV, bone density and diabetes testing; and health education for the whole family. One out of every three women at the Norton health fair had abnormal test results and received treatment at no cost within days. Test results were provided the same day, and when treatment was needed, an immediate care plan was designed and provided by doctors.

“I was afraid to come today because I’ve had this bad pain and discharge for a couple of months and knew I had cervical cancer. But the doctors told me it’s a yeast infection. They gave me medicine—free—and I have an appointment to come back. Thank you!”
THE FOUNDATION’S CONVENING POWER

The Prevent Cancer Foundation® has used its extraordinary convening power to create shared dialogue and bring to the forefront groundbreaking new research in cancer prevention and early detection. With your help, we’ve done it time and time again, and we’re not stopping here.

Dr. MaryLynn Ostrowski, Executive Director of the Aetna Foundation, delivered the keynote address at the 2017 Dialogue for Action® and gave a powerful assessment on the social determinants of health and why your zip code is more predictive of your health than your genetic code. “Social determinants vary between communities across the country and can ultimately end up affecting health and longevity,” said Dr. Ostrowski. “By addressing the health and wellness of all communities, we improve how long and how well people live in their local communities across the nation.” Social determinants of health include access to transportation, housing, education and community safety, just to name a few.

“By addressing the health and wellness of all communities, we improve how long and how well people live in their local communities across the nation.”

— Dr. MaryLynn Ostrowski
Executive Director, the Aetna Foundation

Your Zip Code is more important than your Genetic Code
Dialogue for Action®

Dialogue for Action® is an annual national conference that brings together a diversity of stakeholders, including primary care physicians, patient navigators, social workers, researchers and other medical professionals, to discuss the best ways to support cancer screening, prevention and risk reduction initiatives in their communities.

The Foundation’s 19th annual Dialogue for Action® took place in McLean, Virginia on April 19-21, 2017. The conference included panels and break-out sessions on topics such as prevention initiatives to reduce health disparities, research trends and advancements in cancer prevention and early detection, developments in imaging for cancer screening, updates on screening guidelines, global prevention and early detection and much more.

This year’s participants came from 35 states, nine American Indian/Alaska Native agencies and organizations, the District of Columbia, Puerto Rico, Guam, Nigeria and Tunisia.

“I am much more aware of the screening protocols and categories, and best of all, I now understand why the age groups are significant in who gets screened and who doesn’t. This information can now be passed on to my patients.”

— Dialogue 2017 participant

“We plan to enact a better program for cancer screening and prevention in Tunisia. The types of cancer discussed at the Dialogue are some of the most prevalent and deadly in our country.”

— Dr. Amna Khalfaoui
Tunisian Association for Defending the Right to Health
Dialogue 2017 participant
OUTREACH

Community Grants
Organizations across the country and around the globe are doing extraordinary work to get at-risk communities the education and screenings they need to prevent cancer or detect it early.

This year, 10 projects ranging from Honolulu to Reading, Pennsylvania, received grants of $25,000 each to provide cancer prevention education and early detection services for underserved populations.

Meanwhile, international community grants were given to groups in Ghana, Kenya and Mozambique, where cervical cancer is often diagnosed in advanced stages. A grant was also awarded to an organization working to assure high-quality lung cancer screening worldwide and establish a standard for image quality across 40 international screening sites.

You can help ensure more community grants like these go to programs that make a real difference in the lives of our neighbors and our friends around the world.

An international community grant was awarded to the Radiological Society of North America for their project to assure high-quality lung cancer screening worldwide. Working with 40 international lung cancer screening sites, the goal is to establish a standard for image quality across numerous international screening sites. To meet this goal, a novel image certification protocol will be implemented at sites performing low-dose computed tomography (CT) lung cancer screening. Global certification is made feasible with the use of cloud-based tools, crowd-sourced data and a low-cost image quality assessment phantom.

“This is a very important project to get a high bar set for quality in quantitative imaging for lung cancer screening.”

— James L. Mulshine, M.D. Vice-Chairman, Scientific Director, Prevent Cancer Foundation®

Top right: The CHOW Project in Hawaii received a $25,000 grant and is implementing a hepatitis B education program with the goal of testing at least 250 at-risk Pacific Islanders. The project will link those who test positive for the virus with hepatitis B care coordinators, who will ensure they get necessary medical care and treatment to prevent liver cancer.

Bottom right: The Save My Mother project is focusing on the prevention, screening and treatment of cervical cancer among women in Ghana. With the Foundation’s $25,000 grant, the goal of the project is to screen 5,000 women at risk of cervical cancer and create awareness of cervical cancer among 30,000 men and women. The project will utilize stakeholder partners to provide necessary follow-up care and treatment.

$540,000 awarded in Community Grants in 2017
More than 20 years of Foundation funding for the Mammovan

Recognizing that Washington, D.C. has the highest state-level breast cancer mortality rate in the country, you have enabled us to provide funding for the George Washington University Breast Care Center’s mobile mammography unit—the Mammovan. The van provides free mammograms to women who otherwise might not have access to screenings in D.C., Maryland and Northern Virginia community centers, clinics and churches. Since the program’s inception in 1996, your support has increased access to mammography services among minorities, low-income communities and the uninsured. Additionally, the program works to ensure that every woman with abnormal results receives a follow-up diagnosis and treatment, regardless of her ability to pay.

¡Celebremos la Vida!

“God bless all of you, especially to the ¡Celebremos la Vida! program and people that make possible this kind of service, which saves our lives year by year.”
— Program participant

Since 1994, ¡Celebremos la Vida! (Let’s Celebrate Life!) has been providing breast and cervical cancer education and screening to medically underserved Hispanic women in the Washington, D.C. area. ¡Celebremos la Vida! ensures participants receive free/low-cost comprehensive education and screening in a setting that is culturally appropriate and nurturing. Without this access and support network, many of these women would suffer from a lack of confidence in navigating breast/cervical cancer screening and possible cancer care needs. Your donations will continue to make this program a success and will carry it forward another 25 years.
Thanks to your help, the Prevent Cancer Foundation’s reach extends around the globe.
The Foundation funds Technical Fellowships, focusing on the international exchange of knowledge to enhance skills in cancer prevention and early detection. The program was initiated through a partnership with the Union for International Cancer Control (UICC), an international non-profit organization. The fellowships allow health care professionals from around the world to learn new techniques and skills in the early detection and treatment of cancer at top research and cancer institutes that can be applied in the fellows’ home institutions upon their return.

Prof. Fabrizio d’Adda di Fagagna
IFOM, Fondazione Istituto FIRC di Oncologia Molecolare
Milan, Italy

Area of study: Diet in the prevention of telomere dysfunctions

Host Institution: University of Southern California, U.S.

Purpose: Diet has an impact on health and longevity. Professor d’Adda di Fagagna will study with a lab at the University of South California (USC) on dietary restriction, such as short-term starvation or low calorie diets, to modulate life spans and age-associated diseases.

Dr. Sonali Susmita Nayak
Tata Memorial Centre
Visakhapatnam, India

Area of study: Cervical cancer screening

Host Institution: Houston Methodist Hospital, U.S.

Purpose: Cervical cancer is one of the most common cancers in women worldwide and has an even higher rate of incidence in countries like India. Seventy percent of the Indian population resides in rural India, so increased screening programs and adequate infrastructure in these areas would help reduce cancer rates. Dr. Nayak plans to study at the Houston Methodist Hospital in order to acquire the skills in cervical testing with the goal of applying these skills in rural India.
Dr. Mario González
Universidad Nacional de Colombia
Colombia

**Area of study:** Ovarian cancer and NSAIDs

**Host Institution:** Queen Mary, University of London, U.K.

**Purpose:** In several investigations, the use of acetaminophen or NSAIDs has been found to lower the risk of developing multiple cancers, including ovarian cancer. The purpose of Dr. González’s study is to evaluate the association between ovarian cancer and these drugs in patients at a referral hospital in Bogotá, Colombia.

---

Dr. Jennifer Walker
University of Melbourne
Melbourne, Australia

**Area of study:** Cancer risk assessment tools in primary care

**Host Institution:** Washington University in St. Louis, U.S.

**Purpose:** Dr. Walker’s objectives are to participate in an academic visit to advance her skills in implementation science, increase opportunities for international collaborations with world leaders in implementation science, and disseminate her research to the international implementation science research community.

---

Olga Aleksandrovna Vlasova
N.N. Blokhin Russian Cancer Research Center
Russia

**Area of study:** Influence of non-mutagenic DNA-binding small molecules on chromatin structure and FACT function

**Host institution:** Roswell Park Cancer Institute, U.S.

**Purpose:** Ms. Vlasova is studying preventive activity against colorectal cancer, demonstrated by a number of natural non-mutagenic DNA-binding compounds.
“While the debate over health care in the U.S. Congress continues, the fact remains that prevention and early detection reduce health care costs and save lives.”

— Carolyn Aldigé
ADVOCACY

This year has seen many significant challenges to prevention and early detection advocacy efforts. Numerous attempts to pass new health care legislation put the Prevention and Public Health Fund in jeopardy, and had those efforts been successful, would have had dire consequences for community organizations that provide screenings and vaccinations to millions of Americans who can’t afford them. This has made it all the more important for the Foundation to grow and engage its advocacy base, while continuing to support legislation that makes it easier for people to access lifesaving cancer screening and coverage for preventive services. As part of that effort, the Foundation’s Advocacy Toolkit provides a step-by-step guide for advocates on speaking with your respective members of Congress and engaging them in a dialogue to advance access to innovative services.

The Foundation’s policy and advocacy program is here to educate public officials and move the debate in Congress, as well as to engage and empower grassroots advocates across the nation. Our biweekly online advocacy newsletter serves to inform stakeholders on current issues that impact prevention and direct advocates toward opportunities to become effective change agents.

Moving into next year, we will continue our work in advocating for new preventive measures and ensuring all Americans have access to and coverage for the cancer vaccinations and screenings they need.

Make your voice heard and join our growing advocacy network. Help us make a difference in cancer prevention and early detection.
The 2017 Annual Spring Gala, “Italy: Icon of Innovation,” was held under the honorary patronage of His Excellency, the Ambassador of Italy, Armando Varricchio and Mrs. Varricchio. The Gala was attended by more than 1,000 people and raised nearly $1.6 million to support cancer research fellowships and community outreach programs.

Gala décor was personally designed by celebrity event planner David Tutera, who is a member of the Foundation’s Board of Directors, The Prevent Cancer Foundation® Annual Spring Gala is repeatedly named by BizBash as one of Washington’s Top 100 Events (#4 in the Benefits category in 2017).

This page, clockwise from top:
His Excellency, the Ambassador of Italy, Armando Varricchio, with (L) Mrs. Varricchio and (R) Carloyn “Bo” Aldigé
(L to R) The Honorable Kevin McCarthy, Hollyn Kidd Schuemann, Jason Van Pelt
(L to R) David Tutera, Stomique Hawrylo, Nii-Quarteyi Quartey, Montre’ Burton
Every year hundreds of dedicated runners and walkers show up in their Prevent Cancer green to take steps to better health, while helping to raise funds for the Foundation’s community programs. This year’s 5k Walk/Run and Health Fair brought in $287,000 for prevention and early detection programs. The event starts and ends at the Washington Nationals ballpark and follows a course along the beautiful Capitol Riverfront, but the fun doesn’t stop there. Participants enjoy the health fair on the stadium concourse, which includes screenings and vaccinations, a walk through the Prevent Cancer Super Colon®, and activities for the whole family, including access to the Nationals’ batting cages.

More than $285,000 raised in 2016
$2.2 million raised in 2017

Awesome Games Done Quick (AGDQ) is a 24/7 video game marathon that is livestreamed around the world in support of the Prevent Cancer Foundation®. Hundreds of video gamers meet in Virginia to “speedrun,” or play games as fast as they can, many of them breaking world records. At the same time, gamers from around the globe tune in online and donate to the Foundation. This year they broke a Foundation event fundraising record, bringing in $2.2 million dollars to Stop Cancer Before It Starts®

“I lost my father this April to liver cancer....Thank you guys so much for this stream, you don’t know how much it means to those of us that have lost loved ones to cancer.”

— AGDQ donor

“Greetings from England. I don’t have a personal ‘cancer story,’ but I know plenty of people whose lives have been affected by the disease. Let’s make a world where no one has a cancer story.”

— AGDQ donor

WAYS TO GIVE

The Prevent Cancer Foundation® relies on donations from supporters like you. Thanks to these donations, we have invested in groundbreaking cancer research in support of our mission for more than three decades. We value your partnership and hope you will continue to support our vision to Stop Cancer Before It Starts®.

Here are several ways you can support the Prevent Cancer Foundation® today:

Give Monthly
Recurring gifts provide the Foundation with consistent funds and are easier on your pocketbook.

Direct Giving
Every dollar donated supports our vision to Stop Cancer Before It Starts®.

Celebrate a Loved One
Donate in honor of a loved one and help save the lives of others.

Plan a Gift
Help cancer prevention and early detection now and in the years to come.

Give at Work
A simple way to give through your payroll deductions. Our combined federal campaign number is CFC 11074.

Thank You!
DONOR SPOTLIGHT

“Cancer is still an ongoing, major disease that affects people regardless of age. Education is paramount to this cause. The Prevent Cancer Foundation® does their part to make it more accessible to the general population.”

— Koo Yuen

“In an environment where changes happen so quickly; it is vitally important that all sources (big and small) be given the funding and the opportunity to develop their research in the prevention and early detection of cancer. It is equally important that this new information is dispersed to all cancer patients so that no one has to say, ‘If I had only known.’ Prevent Cancer is doing just that.”

— John A. Hanley, cancer survivor
OUR DONORS

THE EDWARD PERRY RICHARDSON LEGACY SOCIETY

Edward Perry Richardson was the father of Carolyn R. Aldigé, president and founder of the Prevent Cancer Foundation. His struggle against cancer inspired her to establish the organization and his memory has sustained Prevent Cancer’s mission of saving lives across all populations through cancer prevention and early detection. Members of the Edward Perry Richardson Legacy Society are special friends of the Prevent Cancer Foundation who have committed to ensuring the legacy of Prevent Cancer by naming it as a beneficiary in their will, charitable gift annuity, charitable trust, individual retirement account or life insurance policy, or have made a gift of real estate or tangible personal property.

MEMORIAL AND HONOR TRIBUTES
These tributes are special ways to honor friends, loved ones and colleagues. Honor gifts often mark a special occasion like Mother’s or Father’s Day, bat/ bar mitzvahs or a birthday. Many couples also designate the Prevent Cancer Foundation as a recipient of contributions in lieu of wedding or shower gifts. In return, the Foundation sends a card acknowledging these thoughtful donations.

Mr. Joseph Zegers

THE DOLL SOCIETY ($25,000 AND ABOVE)
Sir William Richard Shaboe Doll, a distinguished British physician and epidemiologist, was the first scientist to establish the link between smoking and lung cancer. This singular discovery led scientists to identify a genetic mutation which is caused by chemicals found in tobacco smoke.
