Results

Eight PLC sessions were held during the program period with an average attendance of 17 participants each. Four sessions were developed and led by program staff; four sessions were developed and led by outside content experts.

Average Participant Overall Rating of program-led sessions 3.6 out of 4
Average Participant Level of Agreement with statement “I have learned from others’ successes and challenges in implementing EBIs.” 4.5 out of 5

Examples of Participant-Reported Intended Actions Following PLC Sessions

- Share project-wide data with leadership
- Get a provider champion
- Create onboarding for new CRC team members
- Use patient survey results for QI
- Promoting project within my organization
- Use a formalized FIT kit tracking tool
- Review your organization’s CRC screening policy

Participant Feedback

“So the peer learning opportunities, I think, were good and positive, and it wasn’t always about CRC. It was about program sustainability or PDAs or communication with your patients. And all of those are good pieces to the program.”

“I think that the trainings that we’ve gotten are helpful and useful...It’s like you’re meeting other partners that share their information and whatever is not helpful for us might be helpful for them, or whatever is not working for us, might help them. And just meeting new people, because if I have questions, I can feel free to call someone from another FQHC.”

Conclusion

Since 2015, Screen for Life WI has achieved a weighted screening rate increase of 17.7%* through this comprehensive, multi-component program which includes a consistent, in-person Peer Learning Collaborative.

*34.8% to 52.5%
