

Improving the Impact of the QIBA CT Small Lung Nodule Profile – Panel Discussion

Panelist Sam Armato, PhD
The University of Chicago

Consistency of Image Quality

- Measurement of change across scans requires consistency
 - in the measurement process

AND

- in the image acquisition process

Consistency of Image Quality

- Consideration of image quality consistency will
 - facilitate compliance with the Profile
 - ensure the most meaningful implementation of the Profile
 - enable quantitative imaging beyond metrics of lesion size

Relative Number of Features Differing from Reference Scan
