
The LGBTQ+ community faces unique barriers when accessing the health care system. Both preventive and essential care are affected, which can result in disparities in cancer risk and treatment.

As the Prevent Cancer Foundation® works toward its mission is saving lives across all populations through cancer prevention and early detection, we must address cancer screening disparities in the LGBTQ+ community. At the 2022 Advocacy Workshop, we are bringing together patient advocacy organizations and LGBTQ+ community and health experts to discuss what needs to change.

1:00 p.m. **Welcome**
