

DARE TO IMAGINE A WORLD WHERE NO ONE DIES OF CANCER

OUR MISSION

The Prevent Cancer Foundation® is the *only* U.S.-based nonprofit organization solely dedicated to cancer prevention and early detection. Our mission is saving lives across all populations through cancer prevention and early detection.

HOW WE WORK

INVESTING IN PEOPLE AND RESEARCH

We fund the most promising new research and contribute to some of the world's most important advances in cancer prevention and early detection nationally and globally.

EMPOWERING WITH EDUCATION

From low-dose CT screening for lung cancer, to vaccinating against HPV, to improving access to screenings such as colorectal and breast cancer screenings, our campaigns increase awareness and share actionable information.

MULTIPLYING COMMUNITY IMPACT

Our community grants program brings cancer screenings—including mammograms, cervical and colorectal cancer screenings and low-dose CT lung cancer screenings—to at-risk, medically underserved communities across the U.S. and around the world.

TAKING ACTION THROUGH ADVOCACY AND POLICY

Our focus is on increasing funding for research, reducing disparities and supporting legislation that improves access to care and screenings.

WHY IT MATTERS

More than 600,000 people died from cancer in the U.S. in 2021. That is more than 1,600 cancer deaths each day. About 50% of these cancer deaths are preventable.¹

When cancer is detected early, it increases your chances for survival. You may also require less extensive treatment or have more treatment options. The five-year survival rate is almost 90% when cancer is found in its early stages.²

African Americans have the highest death rate and shortest survival of any racial and ethnic group in the U.S. for most cancers.³

3 in 5 Americans are not getting recommended cancer screenings and 32% are not aware of which screenings they should be getting.⁴

ADVANCING HEALTH EQUITY

We are committed to connecting the most vulnerable populations with the most current cancer prevention knowledge and early detection technology available. We do this by meeting people where they are: in their schools, in their communities and even in cyberspace. We provide the knowledge and tools people need in easy and convenient ways.

IMAGINE WITH US

As we look to the future, we are setting bold goals—goals that have the potential to change the entire landscape of cancer prevention and early detection. We are rising to meet the challenge of reducing cancer deaths by 40% by 2035, the Foundation's 50th anniversary.

Specifically, we are committed to investing:

\$20 million toward research in innovative technologies to detect cancer early and advance multi-cancer screening.

\$10 million to expand cancer screening and vaccination access to medically underserved communities.

\$10 million to educate the public about screening and vaccination options.

Together, we **will** *Stop Cancer Before It Starts!*[®]

The Foundation has received Guidestar's Platinum Seal of Transparency, is an accredited charity with the Better Business Bureau and receives the highest ratings from Charity Watch.

EDUCATION CAMPAIGNS

We share lifesaving information with at-risk audiences and serve as a trusted advisor to medically underserved communities.

- [Back on the Books](#)
- [Stay Skin Healthy](#)
- [Think About the Link[®]](#)
- [Too Young for This Sh*t](#)

Our [Congressional Families Cancer Prevention Program[®]](#) equips its members with the resources they need to educate the communities they serve about cancer prevention and early detection.

PROFESSIONAL CONFERENCES & ENGAGEMENT EVENTS

We bring together individuals and organizations to drive support for cancer prevention and early detection and promote healthy lifestyle behaviors.
