

Dear Doctor,

I am here today to ask you to give me a referral for lung cancer screening. I found out about screening with a low-dose CT scan through the ALCASE project.

I can be screened because I:

- **Am 55 years of age or older**
- **Smoke or smoked enough cigarettes to have at least a 30 “pack year” history.** “Pack years” the number of packs smoked a day times the number of years, for instance:
 - 1 pack smoked a day for 30 years
 - 2 packs a day for 15 years
 - Or any amount of smoking that adds up to at least a 30 “pack year.”
- **Either still smoke or quit 15 years ago or less**

I plan to get my screening here: _____ . See the back of this sheet to find out if I need a referral form, and how you can get it for that center.

Lung cancer screening is covered by most private insurance and Medicare. You can bill today’s visit under **G0296** (Counseling visit to discuss the need for lung cancer screening (LDCT) using low dose CT scan).

On the referral, you should order **G0297** (Low dose CT scan (LDCT) for lung cancer screening).

Thank you.

The Alabama Lung Cancer Awareness, Screening and Education (ALCASE) project is a collaboration between GO2 Foundation for Lung Cancer, a national patient advocacy and support organization, and the O’Neal Cancer Center at the University of Birmingham.

If you have questions or would like to learn more about the ALCASE project or lung screening, please contact Kathy Levy, ALCASE Coordinator, at 251-605-0917. Kathy lives in Choctaw County and is here to help!
